DEPARTMENT OF THE ARMY U.S. Army Corps of Engineers Washington, DC 20314-1000

EM 1110-2-1406

CECW-EH

Manual No. 1110-2-1406

31 March 1998

Engineering and Design RUNOFF FROM SNOWMELT

Table of Contents

Subject	Paragraph	Page	Subject Paragra	ph Page
Chapter 1			Chapter 4	
Introduction			Snow Accumulation and	
Purpose	1-1	1-1	Distribution	
Background	1-2	1-1	General 4-1	4-1
Snow Hydrology Modeling		1-1	Precipitation, Snowfall, and	
References		1-2	Snow Accumulation 4-2	4-1
Bibliography and Definitions		1-2	Watershed Definition 4-3	4-2
Scope and Content	1-6	1-2	Design Floods—SWE Estimates	
Units		1-3	from Historical Records 4-4	4-4
			Forecasting Applications—SWE	
Chapter 2			Estimates from Real-Time Data 4-5	4-5
Snowmelt Runoff—A Review			Simulation of Snow Accumulation	
of Fundamental Processes			Using Continuous Modeling 4-6	4-7
General Introduction	2-1	2-1		
Energy and Mass Balance of the			Chapter 5	
Snowcover	2-2	2-3	Snowmelt—Energy Budget	
Snowpack Meltwater Production			Solutions	
and Movement	2-3	2-6	Overview 5-1	5-1
Meltwater Infiltration	2-4	2-7	Basis for Equations 5-2	5-1
Glacier Effects on Runoff	2-5	2-10	Generalized Equations, Rain-on-	
			Snow Situations 5-3	5-6
Chapter 3			Generalized Equations, Rain-Free	
Collection and Analysis of			Situations 5-4	5-8
Basic Data			Summary of Generalized Energy	
General Introduction	3-1	3-1	Budget Equations 5-5	5-13
Summary of Snow and Snowcover	r		Sensitivity of Variables and	
Parameters		3-1	Coefficients in Generalized	
Measurement of Snowfall and			Equations 5-6	5-13
Precipitation	3-3	3-4	•	
On-ground Measurement of			Chapter 6	
Snowcover	3-4	3-5	Snowmelt—Temperature Index	
Remotely Sensed Measurement			Solutions	
of Snowcover	3-5	3-6	Overview—Basic Assumptions 6-1	6-1
Snow Analysis		3-8	Basic Equation 6-2	

EM 1110-2-1406 31 Mar 98

Melt-Rate Coefficient	Subject	Paragraph	Page	Subject	Paragraph	Page
Sensitivity, Range of Magnitude	Melt-Rate Coefficient—			Reservoir Regulation Studies .	10-3	10-9
Magnitude	Sensitivity, Range of					10-12
In Continuous Simulation 10-5 10-15	· ·	6-3	6-1			
Effect of Snow Condition on Runoff Overview Chapter 17 Guidelines for Snowmelt Overview Chapter 19 Guidelines for Snowmelt Overview Chapter 19 Guidelines for Snowmelt Model Selection Chapter 19 General Introduction 11-1 II-1 II-1 II-1 II-1 II-1 II-1 II-1	Truginius III III II		0 1	•		10-15
On Runoff Guidelines for Snowmelt Overview 7-1 7-1 Model Selection 11-1	•					
Overview 7-1 7-1 7-1 Model Selection 11-1 11-3						
Cold Content						
Liquid-Water-Holding Capacity 7-3 7-2 Specifics of Snowmelt Model Selection 11-2 11-1 11-1 Snowpack 7-4 7-2 Summary Fact Sheets for Selected Simulating Change in Snow 7-5 7-2 Impact on Runoff 7-5 7-5 7-2 Impact on Runoff 7-6 7-6 7-8 Appendix A Bibliography Chapter 8						
Movement of Water Through the Snowpack			7-1		11-1	11-1
Snowpack 7-4 7-2 Summary Fact Sheets for Selected Simulating Change in Snow Condition 7-5 7-2 Impact on Runoff 7-6 7-3 Appendix A Bibliography Chapter 8 Snowmelt—Accounting for Changes in Snow and Snow Cover Overview 8-1 8-1 Appendix B Glossary and Notation Snow Cover Sumplified Methods, Lumped Models 8-2 8-1 Principles—Heat, Heat Transfer, and Thermal Properties of Water Models Principles Appendix D Meteorological Relationships Chapter 9 Statistical Analyses Overview 9-1 Data Analysis 9-2 9-1 Water-Supply Forecasting 9-4 9-1 Water-Supply Forecasting 9-4 9-1 Water-Supply Forecasting 9-4 9-1 Water-Supply Forecasting 9-4 9-1 Appendix F Summary Descriptions of Selected Operational Snowmelt Models Operational Snowmelt Models Operational Snowmelt Models Operational Snowmelt Models Operation, Selection of Methodology 10-1 10-1	Liquid-Water-Holding Capacity .	7-3	7-2	Specifics of Snowmelt Model		
Simulating Change in Snow Condition 7-5 7-2 Impact on Runoff 7-6 7-3 Impact on Runoff 7-6 7-3 Impact on Runoff 8-1 Impact on Runoff 7-6 7-3 Impact on Runoff 8-1 Impact on Runoff	Movement of Water Through the					11-1
Condition 7-5 7-2 Impact on Runoff 7-6 7-3 Bibliography Chapter 8 Snowmelt—Accounting for Changes in Snow and Snow Cover Overview 8-1 8-1 8-1 Appendix B Glossary and Notation Simplified Methods, Lumped Models 8-2 8-1 Principles—Heat, Heat Transfer, and Thermal Properties of Water Models 8-3 8-3 Snow Observations During Snowmelt Forecasting 8-4 8-3 Meteorological Relationships Chapter 9 Statistical Analyses Overview 9-1 9-1 Data Analysis 9-2 9-1 Frequency Analysis 9-3 9-1 Water-Supply Forecasting 9-4 9-1 Multiple Regression Forecast Models 9-5 9-2 Assessment of Regression Model Accuracy 9-6 9-3 Chapter 10 Snowmelt Runoff Analysis for Engineering and Forecasting Applications Problem Definition, Selection of Methodology 10-1 10-1	Snowpack	7-4	7-2	Summary Fact Sheets for Select	ted	
Impact on Runoff 7-6 7-3 Appendix A Bibliography Chapter 8 Snowmelt—Accounting for Changes in Snow and Snow Cover Overview 8-1 8-1 Appendix C Simplified Methods, Lumped Models 8-2 8-1 Principles—Heat, Heat Transfer, and Thermal Properties of Water Appendix D Simmary of Basic Physics Principles—Heat, Heat Transfer, and Thermal Properties of Water Appendix D Meteorological Relationships Chapter 9 Statistical Analyses Overview 9-1 9-1 Data Analysis 9-2 9-1 Prequency Analysis 9-3 9-1 Water-Supply Forecasting 9-4 9-1 Multiple Regression Forecast Models 9-5 9-2 Assessment of Regression Model Accuracy 9-6 9-3 Chapter 10 Snowmelt Runoff Analysis for Engineering and Forecasting Applications Problem Definition, Selection of Methodology 10-1 10-1	Simulating Change in Snow			Snowmelt Models	11-3	11-3
Chapter 8 Snowmelt—Accounting for Changes in Snow and Snow Cover Overview 8-1 8-1 8-1 Appendix C Simplified Methods, Lumped Models 8-2 8-1 Principles—Heat, Heat Transfer, and Thermal Properties of Water Models 8-3 8-3 Snow Observations During Snowmelt Forecasting 8-4 8-3 Meteorological Relationships Chapter 9 Statistical Analysis 9-2 9-1 Data Analysis 9-2 9-1 Equations Frequency Analysis 9-3 9-1 Water-Supply Forecasting 9-4 9-1 Multiple Regression Forecast Models 9-5 9-2 Assessment of Regression Model Accuracy 9-6 9-3 Chapter 10 Snowmelt Runoff Analysis for Engineering and Forecasting Applications Problem Definition, Selection of Methodology 10-1 10-1	Condition	7-5	7-2			
Chapter 8 Snowmelt—Accounting for Changes in Snow and Snow Cover Overview 8-1 8-1 8-1 Appendix C Simplified Methods, Lumped Models 8-2 8-1 Principles—Heat, Heat Transfer, and Thermal Properties of Water Models 8-3 8-3 Snow Observations During Snowmelt Forecasting 8-4 8-3 Meteorological Relationships Chapter 9 Statistical Analysis 9-2 9-1 Data Analysis 9-2 9-1 Equations Frequency Analysis 9-3 9-1 Water-Supply Forecasting 9-4 9-1 Multiple Regression Forecast Models 9-5 9-2 Assessment of Regression Model Accuracy 9-6 9-3 Chapter 10 Snowmelt Runoff Analysis for Engineering and Forecasting Applications Problem Definition, Selection of Methodology 10-1 10-1	Impact on Runoff	7-6	7-3	Appendix A		
Chapter 8 Snowmelt—Accounting for Changes in Snow and Snow Cover Overview 8-1 8-1 8-1 Appendix C Simplified Methods, Lumped Models 8-2 8-1 Principles—Heat, Heat Transfer, and Thermal Properties of Water Models 8-3 8-3 Snow Observations During Snowmelt Forecasting 8-4 8-3 Meteorological Relationships Chapter 9 Statistical Analyses Overview 9-1 9-1 Data Analysis 9-2 9-1 Prequency Analysis 9-3 9-1 Water-Supply Forecasting 9-4 9-1 Appendix F Multiple Regression Forecast Models 9-5 9-2 Operational Snowmelt Models Accuracy 9-6 9-3 Chapter 10 Snowmelt Runoff Analysis for Engineering and Forecasting Applications Problem Definition, Selection of Methodology 10-1 10-1	1					
Snowmelt—Accounting for Changes in Snow and Snow Cover Overview 8-1 8-1 8-1 Appendix C Summary of Basic Physics Models 8-2 8-1 Principles—Heat, Heat Transfer, and Thermal Properties of Water Models 8-3 8-3 Snow Observations During Snowmelt Forecasting 8-4 8-3 Meteorological Relationships Chapter 9 Statistical Analyses Overview 9-1 9-1 Pata Analysis 9-2 9-1 Equations Frequency Analysis 9-3 9-1 Water-Supply Forecasting 9-4 9-1 Appendix F Summary Descriptions of Selected Operational Snowmelt Models Accuracy 9-6 9-3 Chapter 10 Snowmelt Runoff Analysis for Engineering and Forecasting Applications Problem Definition, Selection of Methodology 10-1 10-1	Chapter 8					
Changes in Snow and Snow Cover Overview 8-1 8-1 Appendix C Summary of Basic Physics Models 8-2 8-1 Principles—Heat, Heat Transfer, and Thermal Properties of Water Models 8-3 8-3 Snow Observations During Snowmelt Forecasting 9-1 9-1 Data Analysis 9-2 9-1 Frequency Analysis 9-3 9-1 Water-Supply Forecasting 9-4 9-1 Water-Supply Forecasting 9-6 9-3 Chapter 10 Snowmelt Runoff Analysis for Engineering and Forecasting Applications Problem Definition, Selection of Methodology 10-1 10-1	-			Annendix B		
Snow Cover Overview 8-1 8-1 8-1 Appendix C Simplified Methods, Lumped Models 8-2 8-1 Principles—Heat, Heat Transfer, and Thermal Properties of Water Models 8-3 8-3 Snow Observations During Snowmelt Forecasting 8-4 8-3 Meteorological Relationships Chapter 9 Statistical Analyses Overview 9-1 9-1 Generalized Snowmelt Data Analysis 9-2 9-1 Equations Frequency Analysis 9-3 9-1 Water-Supply Forecasting 9-4 9-1 Appendix F Multiple Regression Forecast Models 9-5 9-2 Operational Snowmelt Models Accuracy 9-6 9-3 Chapter 10 Snowmelt Runoff Analysis for Engineering and Forecasting Applications Problem Definition, Selection of Methodology 10-1 10-1						
Overview				Glossary and Notation		
Simplified Methods, Lumped Models 8-2 8-1 Detailed Methods, Distributed Models 8-3 8-3 Snow Observations During Snowmelt Forecasting 8-4 8-3 Chapter 9 Statistical Analyses Overview 9-1 9-1 Data Analysis 9-2 9-1 Water-Supply Forecasting 9-4 9-1 Water-Supply Forecast Models 9-5 9-2 Assessment of Regression Model Accuracy 9-6 9-3 Chapter 10 Snowmelt Runoff Analysis for Engineering and Forecasting Applications Problem Definition, Selection of Methodology 10-1 10-1		Q _1	Q _1	Annondix C		
Models 8-2 8-1 Principles—Heat, Heat Transfer, and Thermal Properties of Water Models 8-3 8-3 Snow Observations During Snowmelt Forecasting 8-4 8-3 Meteorological Relationships Chapter 9 Statistical Analyses Overview 9-1 9-1 Generalized Snowmelt Data Analysis 9-2 9-1 Frequency Analysis 9-3 9-1 Water-Supply Forecasting 9-4 9-1 Multiple Regression Forecast Models 9-5 9-2 Assessment of Regression Model Accuracy 9-6 9-3 Chapter 10 Snowmelt Runoff Analysis for Engineering and Forecasting Applications Problem Definition, Selection of Methodology 10-1 10-1		0-1	0-1			
Detailed Methods, Distributed Models 8-3 8-3 Snow Observations During Snowmelt Forecasting 8-4 8-3 Chapter 9 Statistical Analyses Overview 9-1 9-1 Data Analysis 9-2 9-1 Frequency Analysis 9-3 9-1 Water-Supply Forecasting 9-4 9-1 Models 9-5 9-5 Models 9-5 9-5 Assessment of Regression Model Accuracy 9-6 9-3 Chapter 10 Snowmelt Runoff Analysis for Engineering and Forecasting Applications Problem Definition, Selection of Methodology 10-1 10-1 Appendix E Meterological Relationships Appendix E Metric (SI) Versions of Generalized Snowmelt Equations Appendix F Summary Descriptions of Selected Operational Snowmelt Models		8.2	Q 1			
Models 8-3 8-3 Snow Observations During Snowmelt Forecasting 8-4 8-3 Chapter 9 Statistical Analyses Overview 9-1 9-1 Data Analysis 9-2 9-1 Frequency Analysis 9-3 9-1 Water-Supply Forecasting 9-5 9-2 Multiple Regression Forecast Models 9-5 9-2 Assessment of Regression Model Accuracy 9-6 9-3 Chapter 10 Snowmelt Runoff Analysis for Engineering and Forecasting Applications Problem Definition, Selection of Methodology 10-1 10-1 Appendix E Meterological Relationships Appendix E Metric (SI) Versions of Generalized Snowmelt Equations Appendix F Summary Descriptions of Selected Operational Snowmelt Models		6-2	0-1			
Snow Observations During Snowmelt Forecasting 8-4 8-3 Meteorological Relationships Chapter 9 Statistical Analyses Overview 9-1 9-1 Generalized Snowmelt Data Analysis 9-2 9-1 Fequency Analysis 9-3 9-1 Water-Supply Forecasting 9-4 9-1 Appendix F Multiple Regression Forecast Models 9-5 9-2 Operational Snowmelt Models Assessment of Regression Model Accuracy 9-6 9-3 Chapter 10 Snowmelt Runoff Analysis for Engineering and Forecasting Applications Problem Definition, Selection of Methodology 10-1 10-1		0.2	0.2	and Thermal Properties of	vvater	
Snowmelt Forecasting 8-4 8-3 Meteorological Relationships Chapter 9 Statistical Analyses Overview 9-1 9-1 Generalized Snowmelt Data Analysis 9-2 9-1 Equations Frequency Analysis 9-3 9-1 Water-Supply Forecasting 9-4 9-1 Appendix F Multiple Regression Forecast Models 9-5 9-2 Operational Snowmelt Models Assessment of Regression Model Accuracy 9-6 9-3 Chapter 10 Snowmelt Runoff Analysis for Engineering and Forecasting Applications Problem Definition, Selection of Methodology 10-1 10-1		6-3	0-3	A !! D		
Chapter 9 Statistical Analyses Overview 9-1 9-1 Generalized Snowmelt Data Analysis 9-2 9-1 Equations Frequency Analysis 9-3 9-1 Water-Supply Forecasting 9-4 9-1 Appendix F Multiple Regression Forecast Models 9-5 9-2 Operational Snowmelt Models Assessment of Regression Model Accuracy 9-6 9-3 Chapter 10 Snowmelt Runoff Analysis for Engineering and Forecasting Applications Problem Definition, Selection of Methodology 10-1 10-1		0.4	0.2
